Microsoft

You used at least 10 products this week

How many would you actually use again?

- What did you use?
- What annoyed you?
- What would you change?

Share 1 Product you like and one you don’t

You are already doing Product Management

Observe “Why did they design it like this?”

Question “Why is this painful?”

Improve “What if we changed this?”

PM is not a job title first. It is a way of looking at the world.

Back to story

- I started building from standard 7th
- Pamphlets, hoardings, book covers

- Built Design door – Design agency for colleges and fests

- And I didn’t know I was building skills for prod man

What do Product Managers do?

What do Product Managers do?

Product managers drive the **vision**, **strategy**, **design**, and **execution** of their product.

Vision

Design

Strategy

Execution

Vision

"It is important that humanity become an interplanetary species."

Elon Musk, SpaceX

Strategy

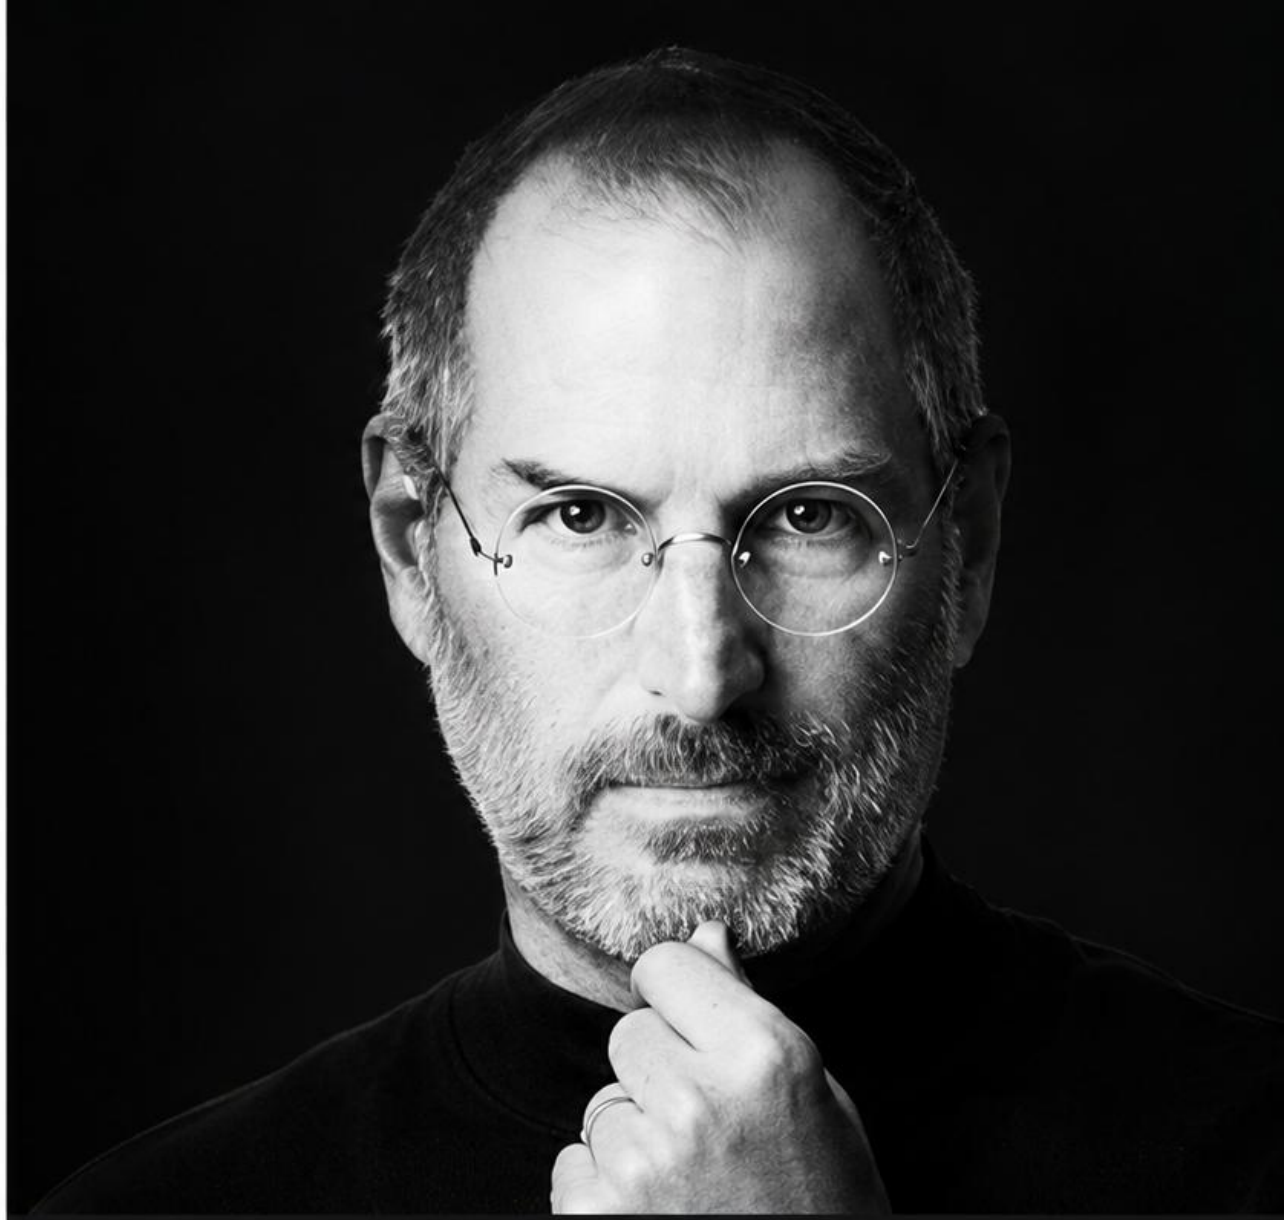

"Your margin is my opportunity."

Jeff Bezos, Amazon

Design

"You have to work hard to get your thinking clean to make it simple."

Steve Jobs, Apple

Execution

“We get 0 points for just getting a feature out the door if it is not actually contributing to making the experience better for users.”

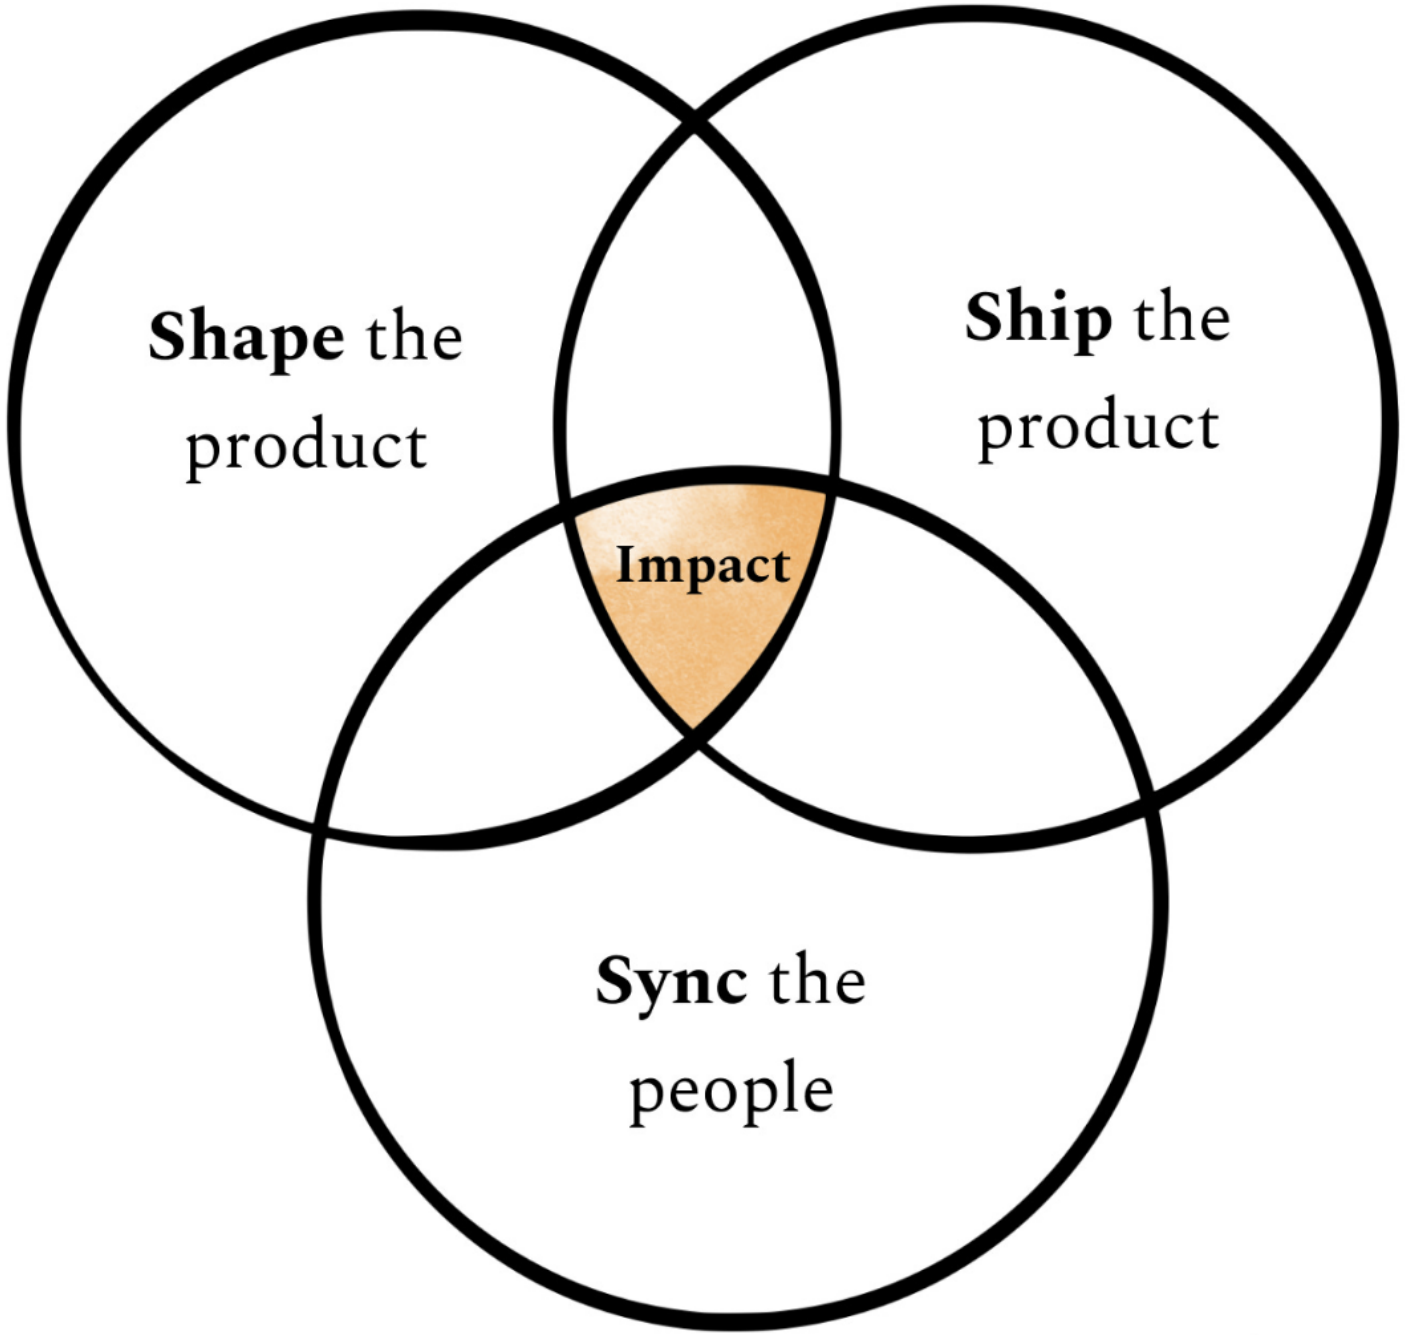

Stewart Butterfield, Slack

Your job as a PM is to deliver business impact by marshaling the resources of your team to identify and solve the most impactful customer problems.

CAN A PRODUCT MANAGER BE A PRODUCT OWNER?
PRODUCT MANAGER

Jobs of a Product Manager

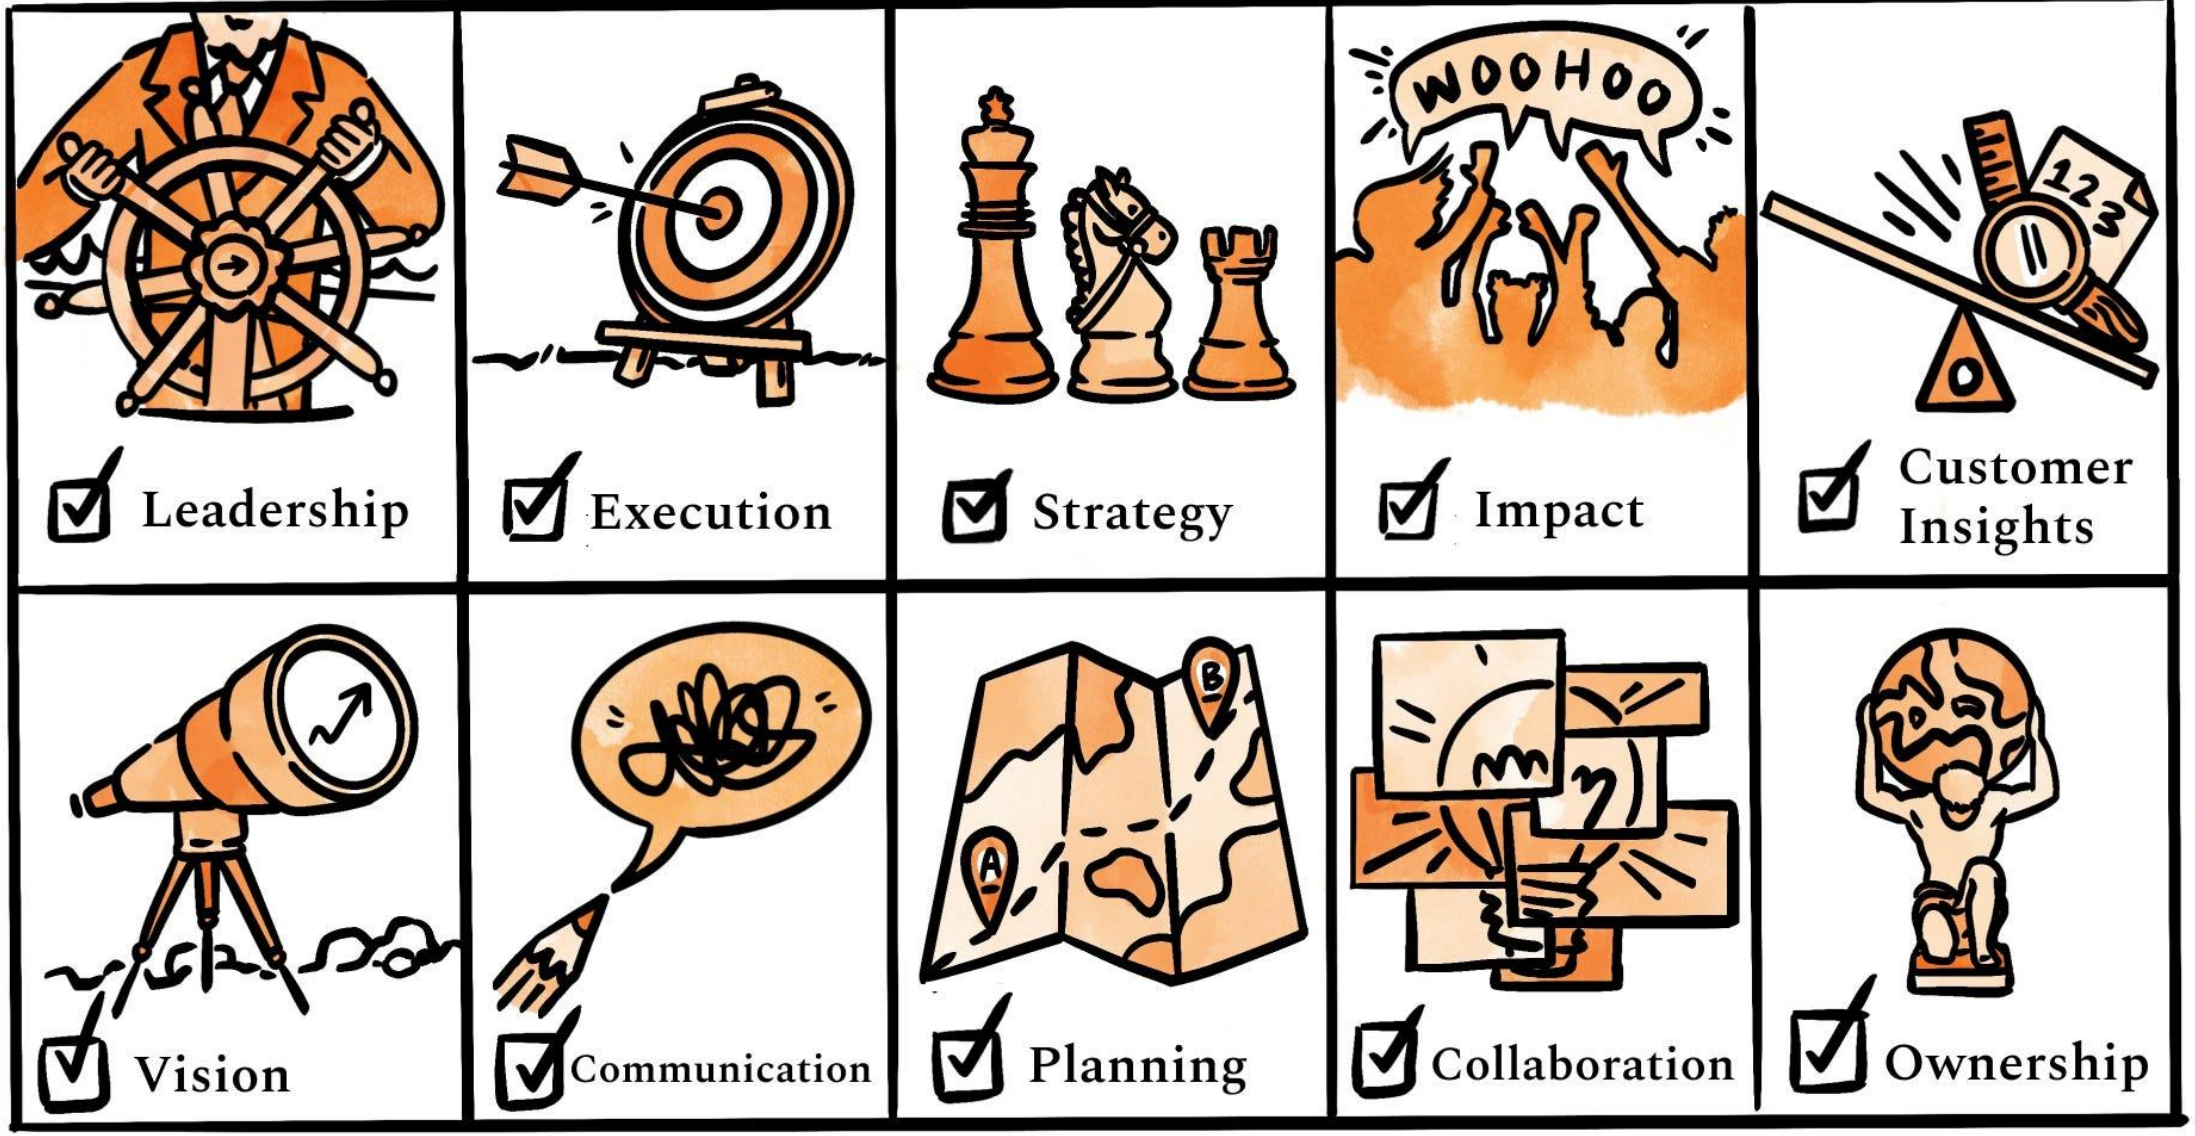

A product is a repeatable system that creates value for a user and captures value for a business

Pick ONE product you used today.

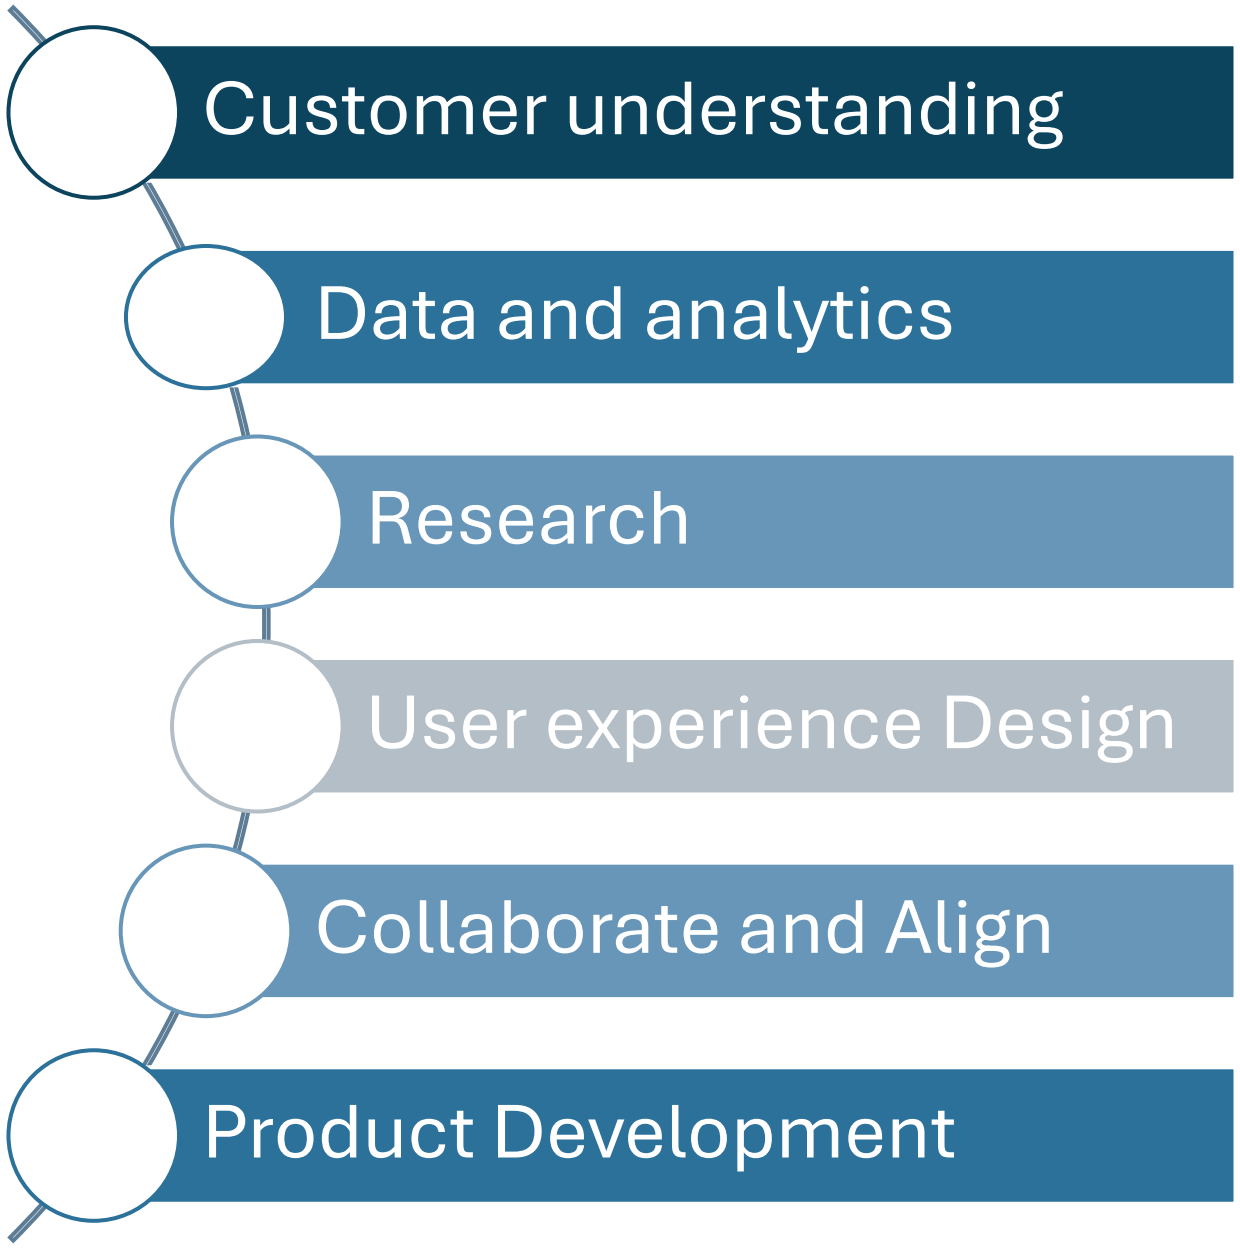

Swiggy / Zomato **Instagram** **Google Maps** **UPI** **Spotify** **ChatGPT**

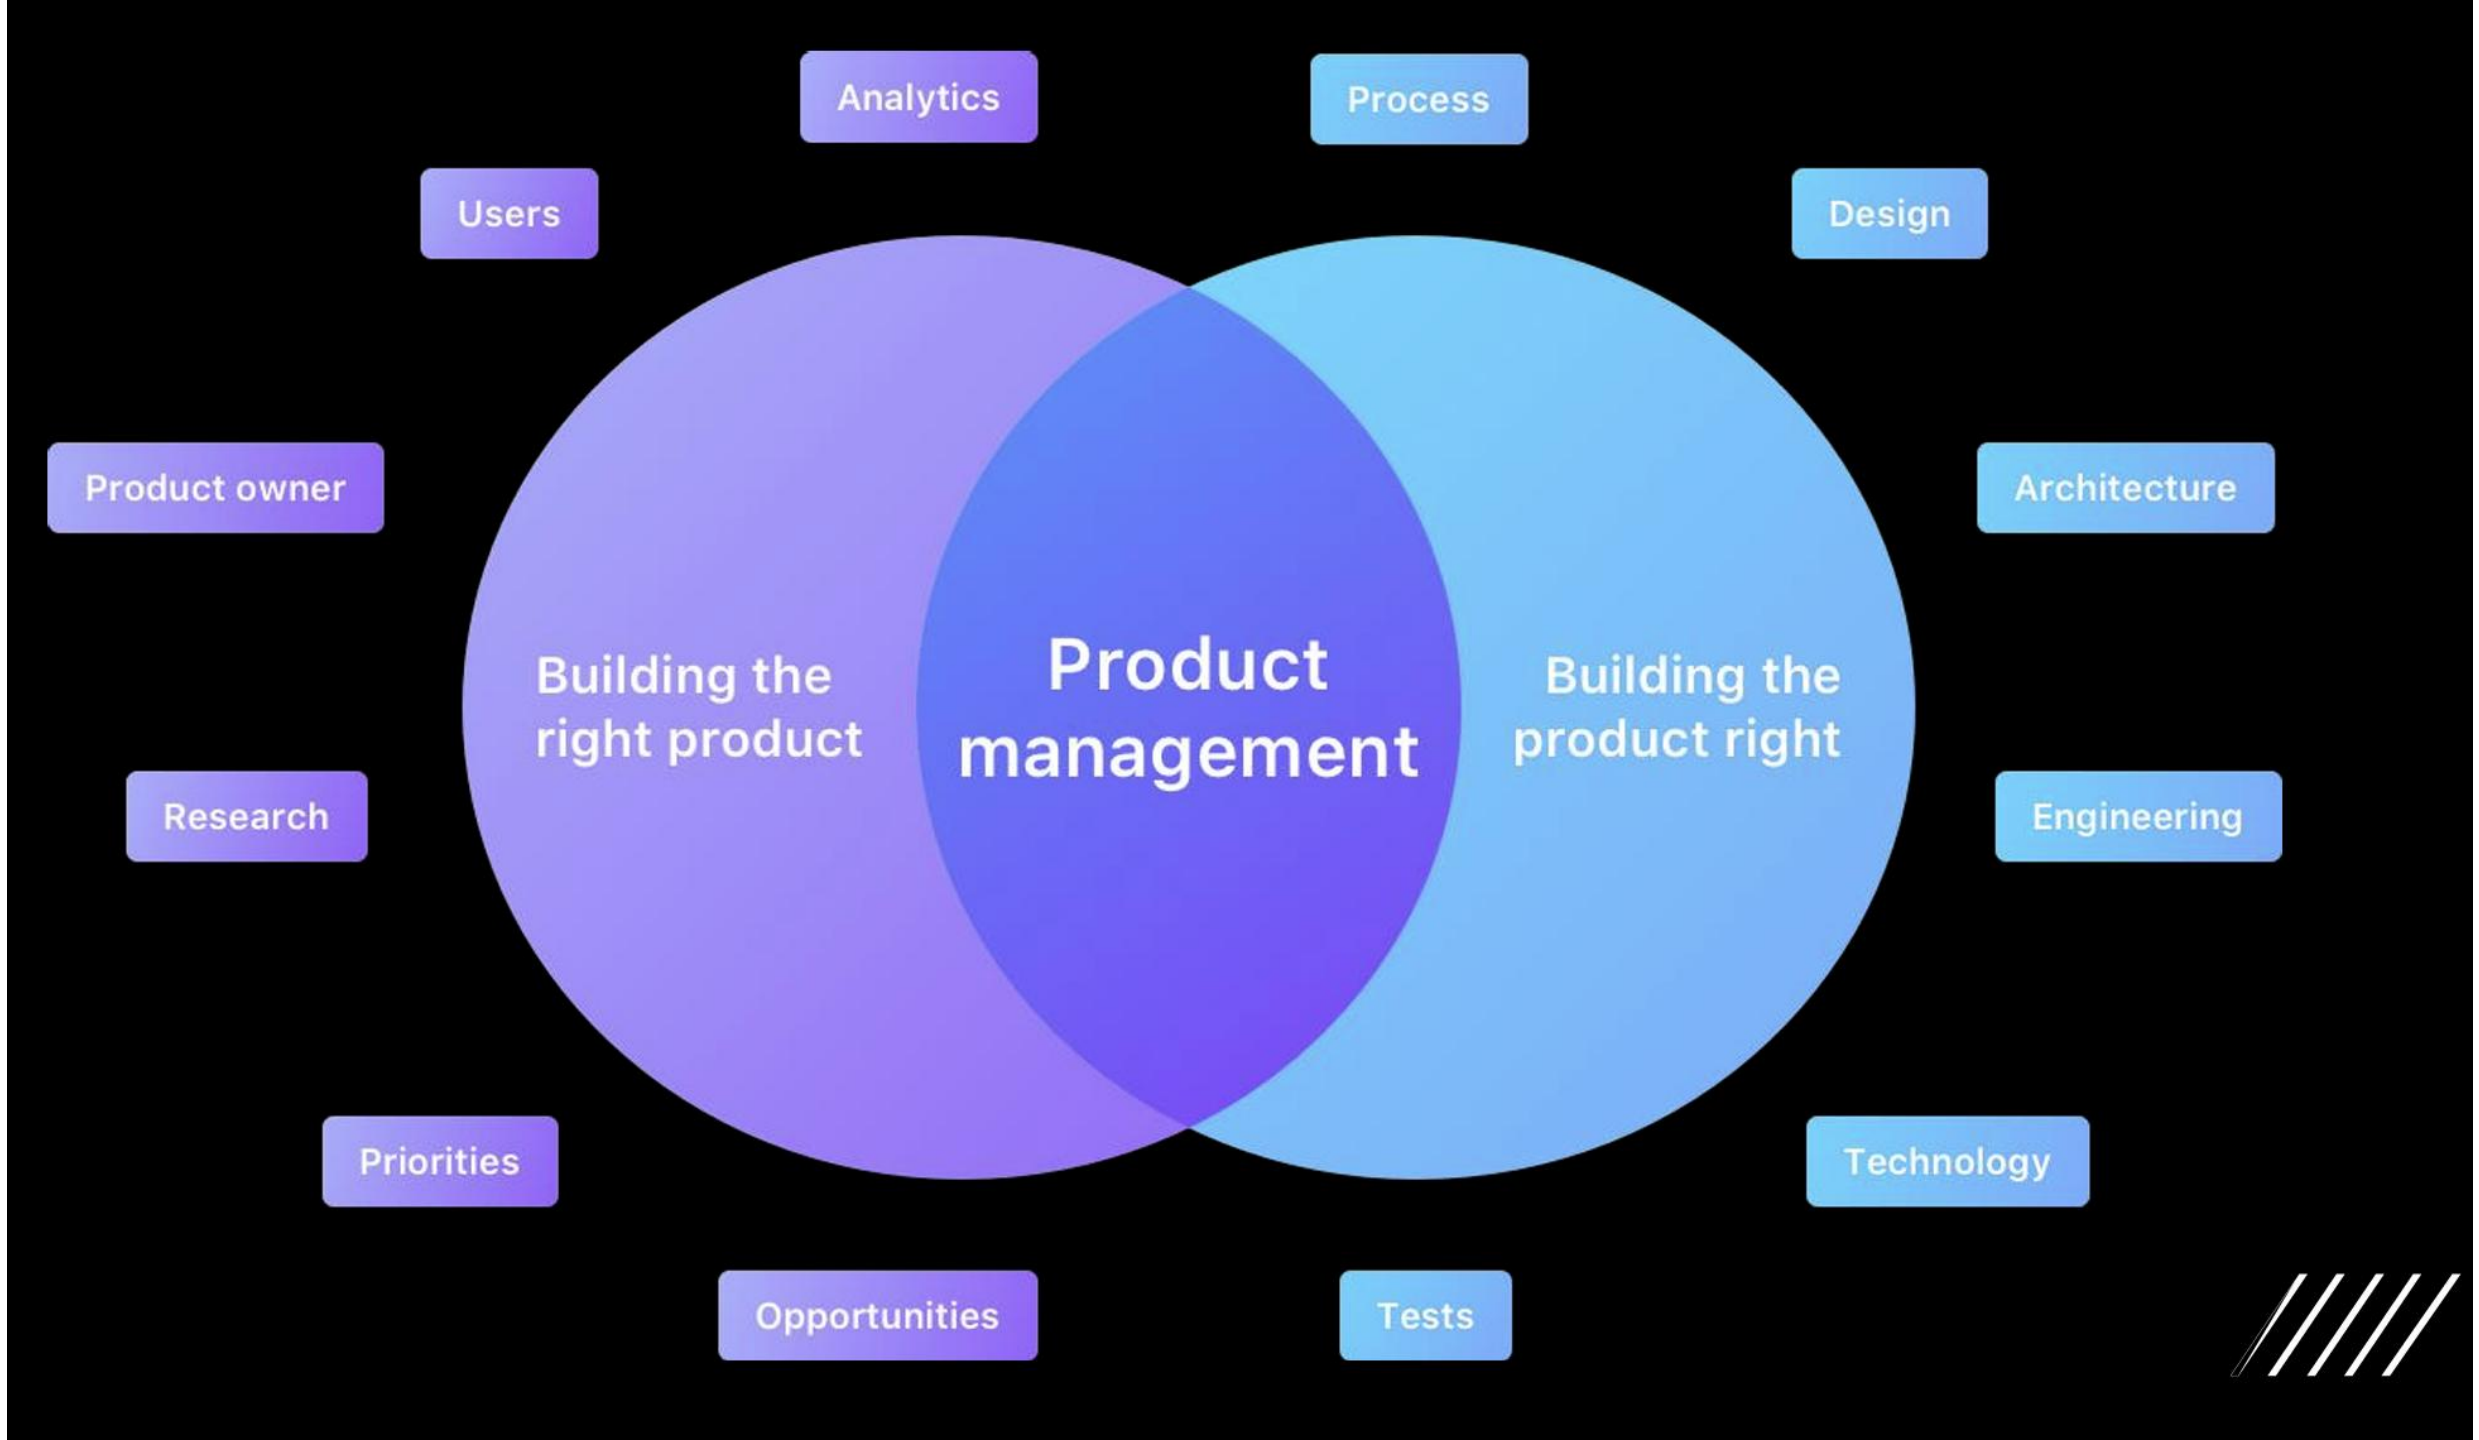

1. Who is the primary user?
2. What job are they hiring it for?
3. What is the “aha” moment?
4. What metric would you watch?
5. What would you remove if forced to simplify it 10×?

The most important PM attributes

"Better products for people"
From insights to impact

PM Skillset

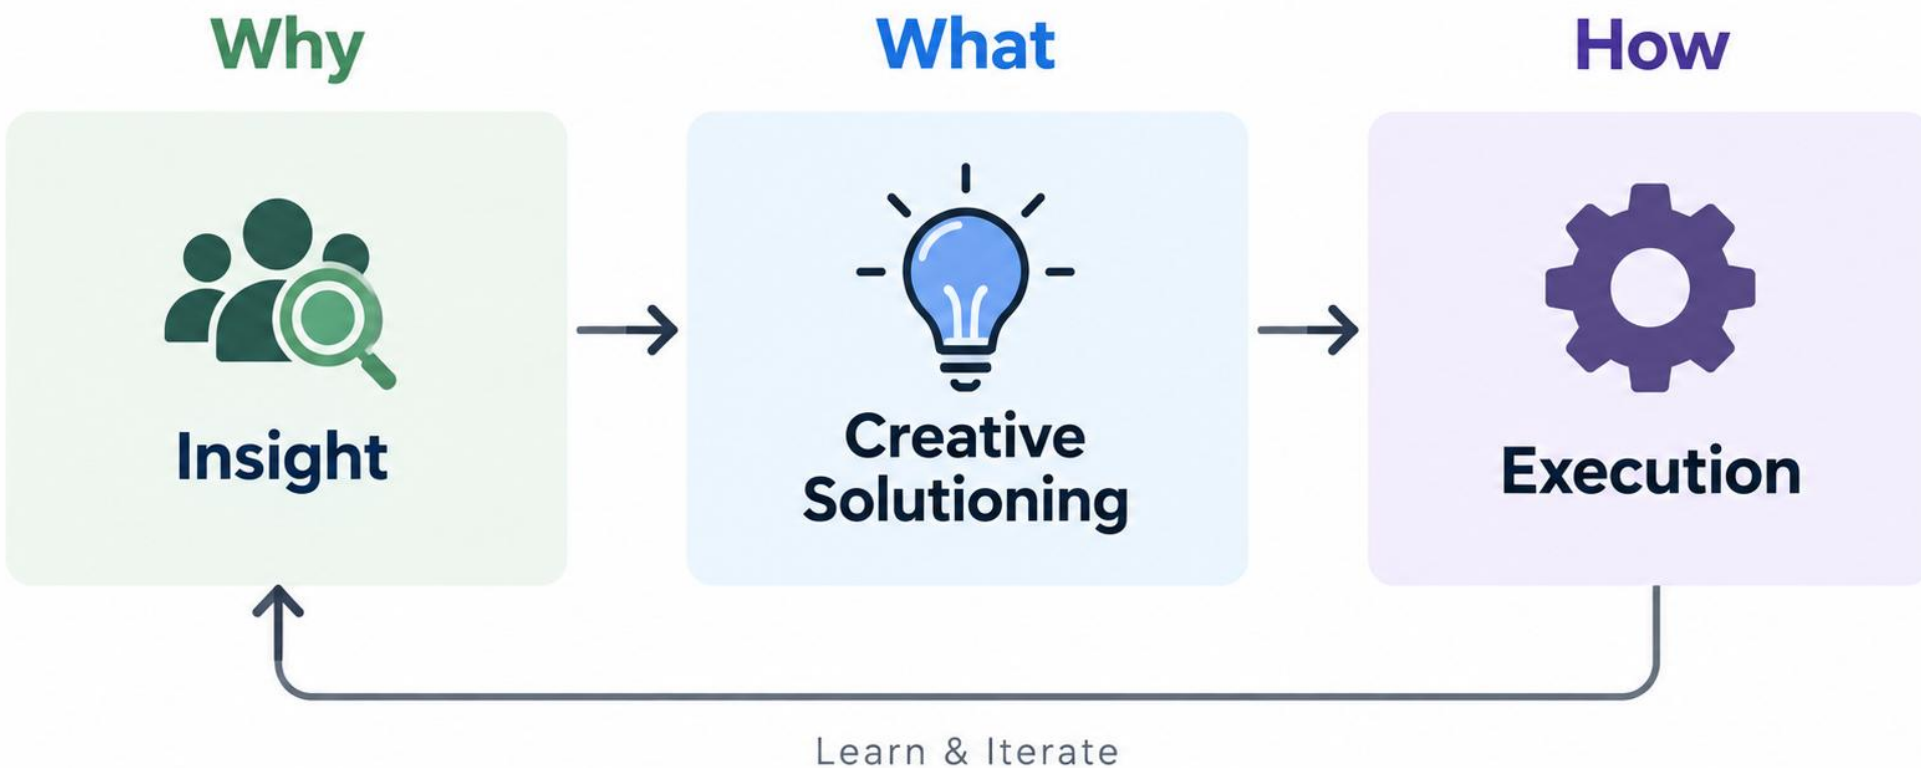

Good intentions. Misaligned focus.
Each group optimizes for their own goals.

Great products live at the intersection.
They solve real customer problems, are technically feasible, and create business value.

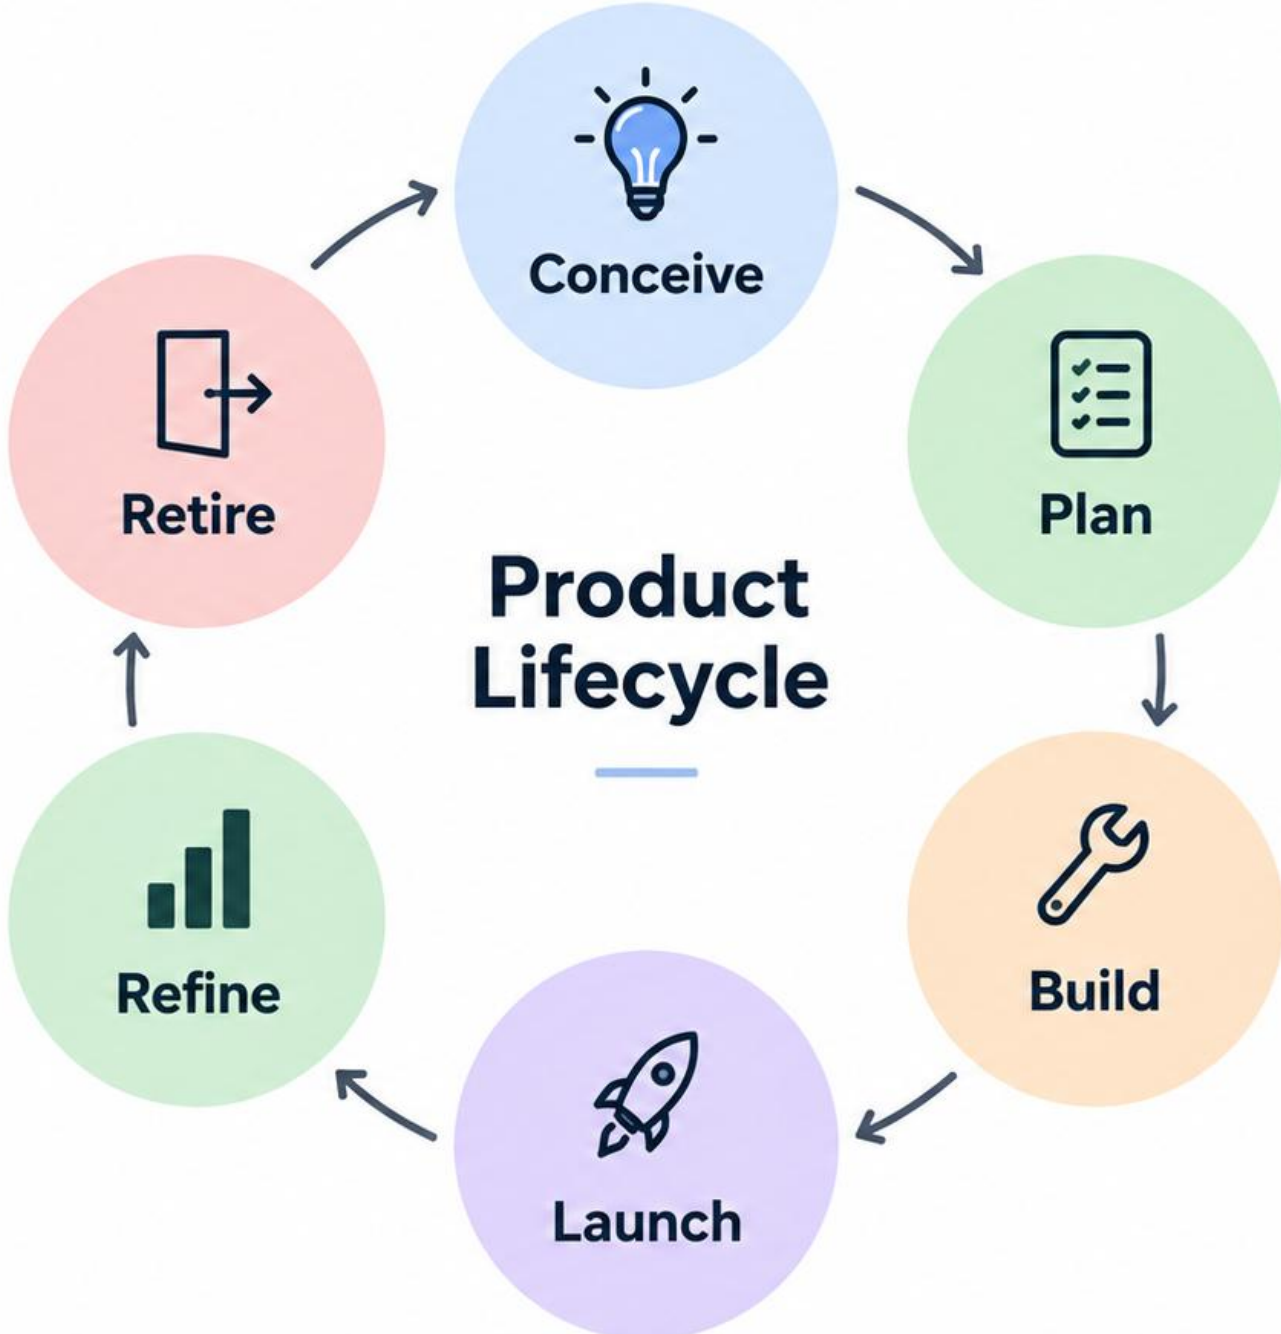

Product Managers make it happen.
By connecting people, insights and trade-offs, PMs turn opportunities into products that matter.

The ICE Model

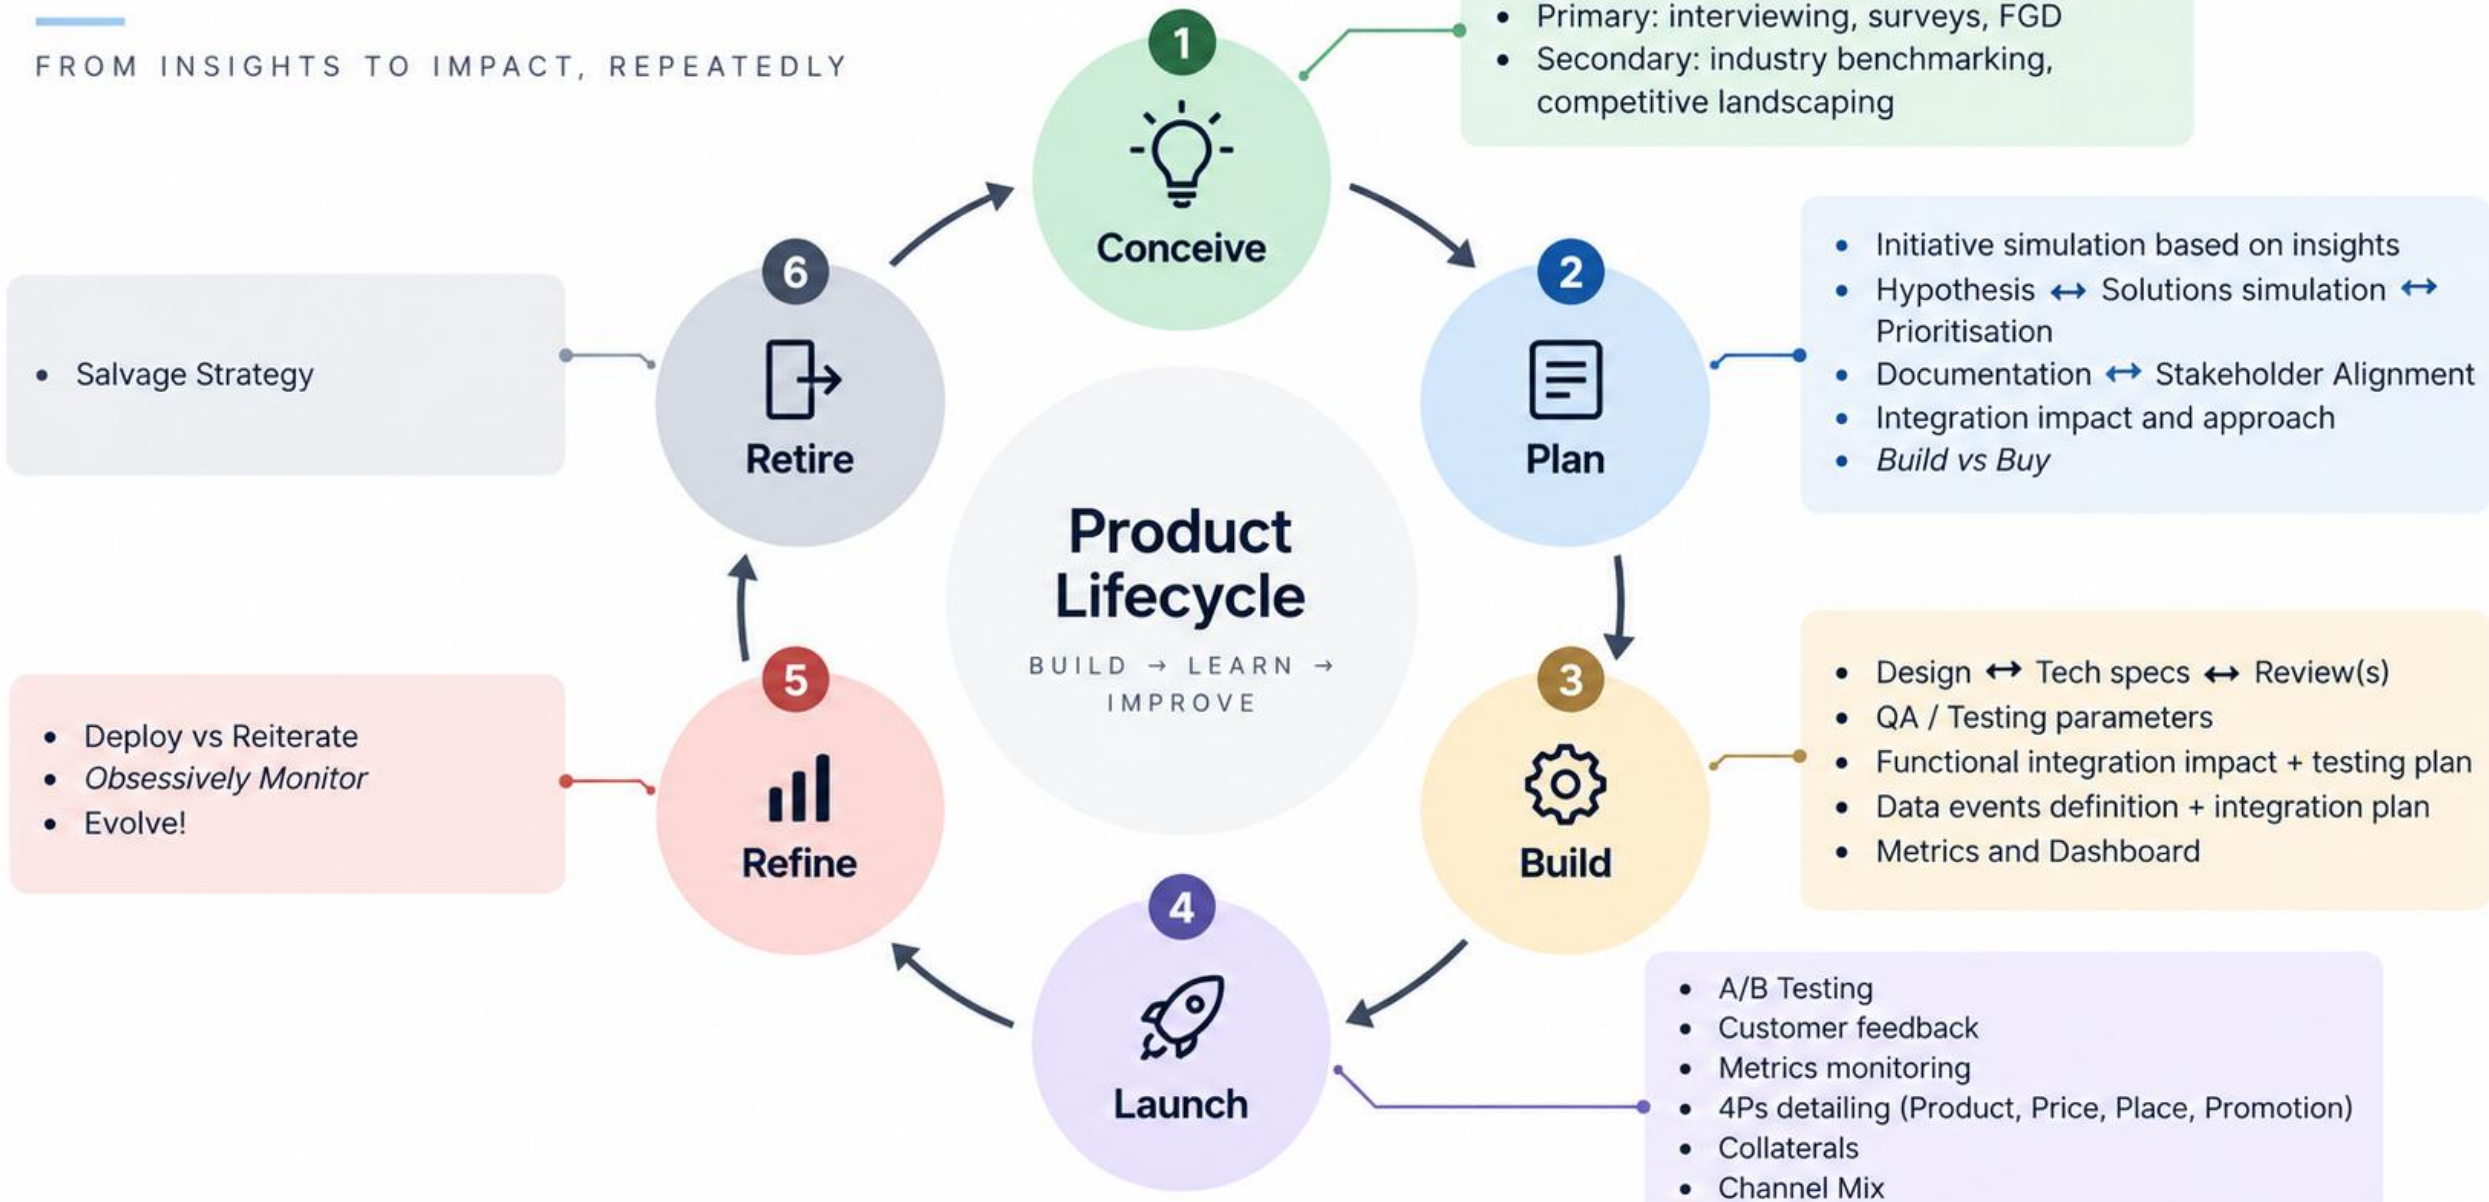

PLC

FROM IDEA TO IMPACT

PLC – Task Breakdown

FROM INSIGHTS TO IMPACT, REPEATEDLY

Product Thinking ≠ feature thinking

FEATURE THINKING

"It has UPI, maps, notifications, AI..."

Lists what exists.

Easy to copy.

PRODUCT THINKING

"It helps me get from A to B with less uncertainty."

Explains why it matters.

Connects user + business + behavior.

Great PMs are problem-solvers with an evidence loop.

Rapid Fire Cases

60 seconds. Diagnose → ask one question → name one metric → propose one experiment.

CASE 01 | **Swiggy**

Orders are high, but users cancel when delivery ETA changes.

Rapid Fire Cases

CASE 02 | **Instagram**

Teen engagement is up, but meaningful friend interactions are down.

Rapid Fire Cases

CASE 03 | **ChatGPT**

Users love answers, but do not return after the first week.

Rapid Fire Cases

CASE 04 | **UPI**

Transactions grow, but users struggle to understand failed payments.
